

E-Commerce Web Application (MERN Stack)

Name: Vimal Kumar

Role: Full Stack Developer

Project Description

This project is a full-stack e-commerce web application developed using the MERN stack. It allows users to browse products, add items to the cart, place orders and manage their accounts. The application provides a seamless and responsive user experience.

Technologies Used

- **Frontend:** React.js, CSS, JavaScript
 - **Backend:** Node.js, Express.js
 - **Database:** MongoDB
 - **Other Tools:** Git, GitHub, REST APIs, JWT Authentication
-

Key Features

- User authentication (Login/Register)
 - Product listing and detailed product view
 - Add to cart and remove from cart
 - Order placement functionality
 - Protected routes using JWT
 - Admin functionality (Add/Edit/Delete products)
 - Responsive UI design
-

My Responsibilities

- Developed frontend UI using React.js
 - Integrated APIs and managed state
 - Built RESTful APIs using Node.js and Express.js
 - Designed and managed MongoDB database
 - Implemented authentication and authorization
 - Handled project deployment and version control
-

-

Conclusion

This project helped me gain practical experience in full-stack development, API integration and database management. It also improved my problem-solving and debugging skills.
